The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

SIXTEENTH INTERNATIONAL CONFERENCE ON QUALITY CONTROL BY ARTIFICIAL VISION

- 12749 02 **Part-level single-view 3D shape reconstruction with multiple types of primitives** [12749-1]
- 12749 03 **Automated fish detection and classification on sonar images using detection transformer and YOLOv7** [12749-2]
- 12749 04 **Construction of a grape quality index from RGB images of crates** [12749-3]
- 12749 05 **Modal approach based on global stereo-correlation for defects measurement in wire-laser additive manufacturing** [12749-4]
- 12749 06 **Combining unsupervised and supervised deep learning approaches for surface anomaly detection** [12749-5]
- 12749 07 **Performance comparison of division of time and division of focal plane polarimeters** [12749-6]
- 12749 08 **Effect of lighting conditions on grape quality control by artificial vision** [12749-7]
- 12749 09 **3D shape estimation of wires from 3D x-ray CT images of electrical cables** [12749-8]
- 12749 0A **Object detection model-based quality inspection using a deep CNN** [12749-9]
- 12749 0B **Frequency perturbation analysis for anomaly detection using Fourier heat map** [12749-10]
- 12749 0C **Concrete structure inspection based on deep learning approaches from visible and radar images** [12749-11]
- 12749 0D **Semi-automatic tools for nanoscale metrology and annotations for deep learning automation on electron microscopy images** [12749-12]
- 12749 0E **Free surface measurement of a fluid in contact with a rotating cylinder** [12749-13]
- 12749 0F **The evolution of the non-destructive defect detection in composites with the use of terahertz radiation** [12749-14]
- 12749 0G **Deep-learning based industrial quality control on low-cost smart cameras** [12749-15]
- 12749 0H **Estimation of subtle facial emotion changes from expressionless images** [12749-16]

- 12749 OI **Visuo-tactile pose tracking method for in-hand robot manipulation tasks of quotidian objects** [12749-17]
- 12749 OJ **OLF: RGB-D adaptive late fusion for robust 6D pose estimation** [12749-18]
- 12749 OK **ACL: active curriculum learning to reducing label efforts** [12749-19]
- 12749 OL **OCR for laser marking quality assessment** [12749-20]
- 12749 OM **Sparse image measurement using deep compressed sensing to accelerate image acquisition in 3D XRM** [12749-21]
- 12749 ON **Single-camera multi-point vision: on the use of robotics for digital image correlation** [12749-22]
- 12749 OO **Hierarchical lossless image coding using CNN predictors considering prediction error distribution** [12749-23]
- 12749 OP **Visual impression estimation system considering attribute information** [12749-24]
- 12749 OQ **Gloss assessment with deep photometric stereo: application to human skin** [12749-25]
- 12749 OR **Scene understanding pipeline for maintenance oriented tasks automation** [12749-26]
- 12749 OS **XRANet: an extra-wide, residual, and attention-based deep convolutional neural network for semantic segmentation** [12749-30]
- 12749 OT **Enhanced key-point detection for plenoptic imaging** [12749-31]
- 12749 OU **We can pass through the wall gap: aperture passage perception via vibration stimuli generated from distance variation** [12749-32]
- 12749 OV **Person segmentation and identification across multiple wearable cameras** [12749-33]
- 12749 OW **Operational modal analysis of a cantilever beam by phase-based sub-pixel motion estimated from experimental videos** [12749-35]
- 12749 OX **Handling noisy annotations in deep supervised learning** [12749-36]
- 12749 OY **Inspection of mechanical assemblies based on 3D deep learning segmentation** [12749-37]
- 12749 OZ **Co-design of an active depth from defocus camera for surface inspection** [12749-38]
- 12749 IO **Image processing through deep learning after DI extraction for the SHM of aeronautic composite structures using Lamb waves** [12749-39]
- 12749 I1 **Visual inspection of complex mechanical assemblies based on Siamese networks for 3D point clouds** [12749-40]

- 12749 12 **Reducing the latency and size of a deep CNN model for surface defect detection in manufacturing** [12749-41]
- 12749 13 **Three-dimensional temperature distribution mapping by generative adversarial network in low light environment using thermography** [12749-44]
- 12749 14 **Underwater SLAM based on object recognition using YOLO in acoustic images** [12749-45]
- 12749 15 **f-AnoGAN for non-destructive testing in industrial anomaly detection** [12749-46]
- 12749 16 **Neural detection of spheres in images for lighting calibration** [12749-47]
- 12749 17 **Unveiling the secrets of paintings: deep neural networks trained on high-resolution multispectral images for accurate attribution and authentication** [12749-48]
- 12749 18 **A shape-from-silhouette method for 3D reconstruction of a convex polyhedron** [12749-50]
- 12749 19 **Automatic scoring in fencing by using skeleton points extracted from images** [12749-51]
- 12749 1A **Laser flying-spot thermography: an open-access dataset for machine learning and deep learning** [12749-52]
- 12749 1B **Detection and characterization of defects on mechanical structures by using 3D vision** [12749-53]
- 12749 1C **Registration of thermal 3D models over time using low cost and portable devices** [12749-54]
